Offshore Energies UK has evolved – OEUK is a member-led trade association. We have over 400 members, spread widely across the energy supply chain. We represent an integrating offshore energy industry which safely provides cleaner fuel, power and products to everyone in the UK. More information on our fields of work below.

CCUS

- Our members are leading the way in developing CCUS infrastructure and storage facilities at scale.
- CCUS guideline groups allow our members to showcase their expertise, plus the benefit of free access.
- As a member you'll be closely involved in government consultations and you can make *your* voice heard.

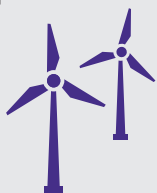

Hydrogen

- Within hydrogen there is skill overlap with Oil & Gas in: production, liquification, shipping and pipelines.
- Many of our members have the expertise for this—promoting best practices and intriguing discussions.
- Join our Energy Transition forum or Hydrogen workgroup. Tangible out-puts will be produced and you can showcase your expertise.

Offshore Wind

- Electrification of oil and gas facilities and development of windfarms presents an opportunity to reduce the carbon footprint.
- Electrification needs to be implemented in the next 5 years. A challenging task and we need to collaborate now, more than ever before.
- Help the industry take big steps towards a net-zero future and offer up your expertise: being at the forefront of the energy transition.

Oil and Gas

- Oil and gas is not just at the heart of OEUKs business—but also the heart of net zero internationally.
- We are the undisputed go to association that speaks on behalf of the UK Offshore Oil and Gas industry.
- OEUK continues to champion best practice and progressing initiatives for the benefit of the industry. We need your help to keep moving forward.
- Wide spread network.
