

CERTIFICATE DESIGN CHALLENGE!

SUPPLEMENTARY INFORMATION

This competition is open for all school-aged children across the UK and will all be judged together.

OEUK will collect the designs and showcase them during the company AGM in December, whereby a winner will be chosen by the members themselves

There must be space for the Member name, OEUK logo and signature of the CEO – these can be moved around the page but must be clear

Depending where the winning design is from will determine the prize – if local to OEUK offices, OEUK will provide transport etc for the winner's class. If not, OEUK will travel to the winning school and provide a pizza lunch.

Any colours can be used. If the winning artwork needs to be adapted, we will do this with the winner together.

OEUK kindly requests that no other logo's, sport designs or affiliated icons be used – all we ask is that the certificate includes images of offshore energy

Anything can be used to create the certificate design – paint, crayon, pencil, we even accept digital submissions.

We want to see as much creativity as possible – please go crazy!

Let us know if you want us to collect from you.
